PROFESSIONAL SUMMARY

Computer Science graduate and technical support professional with hands-on experience in SQL, C#/.NET, web development, systems troubleshooting, networking, and business operations. Built and deployed an FMCG AI & Automation Hub and developed Stockly POS/Stockly Mobi business applications using C# and SQL Server. Brings 7+ years of operations and team-leadership experience with a practical, business-focused approach to software delivery and automation.

CORE SKILLS

Data & AI	Python, Pandas, scikit-learn, feature engineering, demand forecasting, anomaly detection, MAE/RMSE, Streamlit
Software & Web	C#/.NET (WinForms), SQL Server, SQL, JavaScript, React, Vite, HTML, CSS, PHP, Java, C++, WordPress
Tools & Platforms	Git, GitHub, Google Colab, SSMS, VS Code, Cloudflare Workers/Pages, Microsoft Office
IT & Systems	L1 technical support, workstation deployment, hardware/software troubleshooting, networking fundamentals, routing/switching/firewall basics

SELECTED PROJECTS

FMCG AI & Automation Hub | Python, Pandas, scikit-learn, Streamlit | GitHub | Live Demo

- Analyzed 3M+ grocery-retail sales records and engineered time-series, promotion, and national-event features.
- Built Random Forest demand forecasting with chronological validation; improved MAE from 23,840 baseline to 18,148 (~24%), with RMSE of 29,657.
- Added residual anomaly detection, simulated inventory-risk/reorder logic, automated recommendations, and a deployed Streamlit dashboard.

Stockly POS & Stockly Mobi | C#/.NET, WinForms, SQL Server

- Developed retail POS/business-management workflows covering cashier checkout, settlement, receipt printing, products, suppliers, stock entry, barcodes, users, daily sales, and reorder logic.
- Built Stockly Mobi as a companion modular C# application with Login, Dashboard, Cashier, Products, Services, and Settings screens using reusable pages/UserControls.

Bitreca | React, Vite, GitHub, Cloudflare | bitreca.com

- Built and deployed a responsive React/Vite technology-services site; configured GitHub deployment, Cloudflare Workers/DNS, and custom-domain routing.

PROFESSIONAL EXPERIENCE

Technical Support | Inkript Identification Technologies S.A.L, Lebanon — **Oct 2025 - Present**

- Support end users across application, workstation, peripheral, and network issues; diagnose incidents and guide corrective action.
- Deploy, configure, and upgrade workstations and specialized hardware/software; provide remote Level 1 support and on-site intervention.
- Use SQL queries and system data to investigate operational/user issues and support technical reporting and troubleshooting.

Branch Supervisor - TTVMA Project | Inkript Identification Technologies S.A.L, Lebanon — **Nov 2024 - Oct 2025**

- Managed daily branch operations and supervised 3+ employees handling data entry and production for driving and vehicle licensing services.
- Coordinated inventory and supplies, trained staff on systems/printing equipment, and maintained service-quality standards.

Social Media & Web Design Specialist | Mada Theater Academy, Beirut, Lebanon — **Aug 2022 - Dec 2024**

- Developed and maintained the academy WordPress website using HTML, CSS, and JavaScript; monitored analytics to improve digital performance.

Social Media Coordinator & Data Entry Specialist | Merhi Trading, Aley, Lebanon — **Sep 2021 - Aug 2022**

- Maintained product and sales data in Excel/internal systems, supported reports, website/catalog updates, and digital marketing activities.

Branch Manager | Obeid Center, Aley, Lebanon — **May 2014 - Aug 2021**

- Managed daily operations for a 25+ employee team, sales targets, inventory coordination, customer service, and POS processes.

EDUCATION

Bachelor of Science in Computer Science | Modern University for Business and Science, Aley, Lebanon — **2020 - 2024**

Print & Digital Journalism (PDG) | Lebanese University, Beirut, Lebanon — **2009 - 2011**
